PRODUCTIVITY

DESIGNED FOR IPAD

# Create Audio from Anything

## AI Generation

Describe your topic — a tech story, productivity tips — and get polished, unique content in seconds. No writing skills needed.

## Voice Your Content

Paste articles, blog posts, or documents and instantly convert them to narrated audio. Each creation is tailored to your input.

## Two Simple Modes

AI Generation writes and voices complete episodes. Voice Your Content converts existing text to premium audio — instantly.

# Premium Voice Narration & Voice Cloning

## Clone Your Voice

Record for just 1–2 minutes and your content sounds authentically *you* — studio-quality audio perfect for podcasts, audiobooks, or professional presentations.

## Premium AI Narrators

Choose from professional, ultra-realistic AI narrators across multiple languages. Every voice is optimized for natural pronunciation and native flow — indistinguishable from a real narrator.

- ✔ Preview any voice with one tap before creating your podcast.

# Multilingual Content Creation

Create and narrate in **8 languages**: English, Spanish, French, Chinese, Russian, Polish, German, and Italian. Perfect for language learners, international creators, and multilingual audiences.

## Smarter Translations

Translate existing episodes between languages with one tap while preserving voice quality and original meaning.

## Native Pronunciation

Each voice is optimized for natural flow in its language — no robotic accents or awkward phrasing.

## Global Reach

Reach international audiences by producing content natively in their language without extra effort.

# Complete Audio Library & Pro Controls

## Auto-Save & Organization

Every generated audio is automatically saved. Favorites and color tags keep your library perfectly organized; quick search finds any episode instantly.

## Background & Lock-Screen Playback

Listen while multitasking — background listening and lock-screen integration keep your audio running seamlessly.

## Offline Access & Transcripts

Access text transcripts and audio offline anytime. Edit episode content even after creation.

## Instant Sharing

Share audio instantly with colleagues, students, or your audience — and export in high quality.

# Who Is Podcaster For?

## Content Creators

Turn blog posts and newsletters into audio effortlessly.

## Writers

Create audiobook versions of your work without a recording studio.

## Educators

Produce course materials and lectures in minutes.

## Professionals

Consume documents while commuting — hands-free productivity.

# Why Creators Choose Podcaster

## Unlimited Creation

Content that scales with your ambitions — no caps on episodes or length.

## Audio-First Experience

Professional-grade playback controls built for serious listeners and creators.

## Privacy-Focused

Your content stays secure on your device. The developer does not collect any data from this app.

## Repurpose Anything

Voice your existing written content without rewriting a single word. Perfect for repurposing blog posts, articles, or newsletters into engaging audio — instantly.

📄 No rewriting. No recording setup. Just paste and play.

# Subscription & Pricing

## Weekly Plan

\$7.99/week — includes voice cloning, premium narrators, background playback, lock-screen controls, audio export, and ongoing feature updates.

## Flexible Management

Payment charged to your iTunes Account upon purchase. Subscriptions renew automatically — cancel anytime in iOS settings at least 24 hours before renewal.

## Free to Start

Download free and preview premium voices during onboarding — convert any text to audio and hear the quality before subscribing.

# Version History & Updates

Podcaster has been actively improved since launch, with regular updates adding languages, features, and stability improvements.

# Get Started with Podcaster

Available on iPhone, iPad, Mac (Apple M1+), and Apple Vision. Requires iOS 16.6 or later. Supports English, French, German, Italian, Polish, Russian, Simplified Chinese, and Spanish.
